IRIS HAS COME INTO ITS OWN AT LAST.

This familiar and well-beloved flower of spring is decidedly refreshing with the purity of its beauty and its haunting fragrance, they bid fair to out rival the aristocratic Orchid in the wide range of colors, which includes yellows, blues, reds and whites. The winsome modest beauty of some of the varieties form a striking contrast to their more glorious sisters arrayed in a sheen of iridescent splendor. They are perfectly hardy and require only ordinary cultivation. They succeed in various kinds of soils and conditions.
